ABU DHABI SECURITIES EXCHANGE

Abu Dhabi Securities Exchange (ADX) has inked a memorandum of understanding (MoU) with Emerging Markets Real Estate Information Co. (REIDIN) to improve the facilities the exchange provides for its investors and extend real estate market trend information to the Abu Dhabi investment community.

The MoU paves the way to improve the benchmark real estate price indices constructed and updated by REIDIN since January 2009 and develop additional local property price benchmarks and trend information which investors and the public can refer to. The MoU also aims at increasing the level of FDI coming to Abu Dhabi's real estate markets, through creating a platform to facilitate comparison of broad asset price movements over time to international corporate and private investors. Another aim of the partnership between ADX and REIDIN is to increase and provide Financial Literacy information that will open the way for investment vehicles such as Real Estate Investment Trusts (REITs) and Property Derivatives.

The MoU was signed between Mr. Rashed Al Baloushi, CEO of ADX, and Mr. Ahmet Kayhan, CEO of REIDIN, at Abu Dhabi Securities Exchange main offices in Abu Dhabi on Thursday the 26th of April in the presence of senior staff of both organizations.

BUCHAREST STOCK EXCHANGE

Bucharest Stock Exchange (BVB) reported first-quarter 2012 net profit of RON 2.77 million, up 26% compared with the same quarter from 2011 and up 140% from fourth-quarter 2011 (Q1.2011: RON 2.20 million, Q4.2011: RON 1.15 million). The successful closing of the secondary public offer for 15% of the shares issued by the national company of electricity transmission, Transelectrica, was one of the main events which influenced BVB's operating activity in the first quarter of 2012.

First-quarter 2012 sales revenue was RON 5.03 million, down 15% compared to the strong first quarter of 2011 (Q1.2011: RON 5.98 million), following the listing of Fondul Proprietatea on January 25, 2011, which determined a quarterly peak in the value of trading on equity market from 2008 to date. Sales revenue is up 4% from fourth-quarter 2011 (Q4.2011: RON 4.84 million).

Structured products market expanded three times in first-quarter 2011 compared to the first-quarter 2011, due to diversifying offer and increasing investors' interest in these instruments. The volume traded in first-quarter 2011 was almost 8 million structured products, up 70% from fourth-quarter 2011, following the extension of trading hours from 16:45 to 18:30, beginning January 16, 2012. Listing and data vending revenues were up 39% and 58% sequentially in first-quarter 2012 compared to first-quarter 2011.

Operating expenses was RON 3.10 million, down 41% from fourth-quarter 2011 and up 4% from the first quarter in 2011 (Q1.2011: RON 2.98 million, Q4.2011: RON 5.22 million). The significant drop from the fourth-quarter is due to the fact that expenses are returning within a typical level for a first quarter of the year. The 4% rise compared to the same quarter in 2011 is due to higher expenses on organizing January GSM, on taxes paid to NSC, on developing some market segments, on VAT, following the decrease in the pro-rata quote for VAT to deduct calculated by BVB for year 2012, and on new executive search services employed. These higher expenses were compensated with lower base personnel expense, savings on rent and other expenses.

First-quarter 2012 operating result was RON 1.93 million, compared to a loss during the fourth quarter of 2011 (Q4.2011: -0.38 mil.lei) and is down 36% compared to the first quarter of 2011 (Q1.2011: RON 3.00 million). The financial result was profit of RON 1.24 million compared to a loss in first-quarter 2011 (Q1.2011: -RON 0.38 million).

Egyptian Exchange

The Egyptian Exchange (EGX) board approved exemption of companies from the listing fees of the first time. This exemption is provided that companies finished all listing and offering procedures within a period not exceeding three months from 1/7/2012 to 30/9/2012. EGX listing sector will facilitate the documentation and procedural cycle for listing and public offering. This decision came as a part of EGX marketing policy aiming to attract new companies to list on the stock market. On the other hand, EGX board discussed setting a separate trading mechanism for executing large volume deals and to set clear standards to define large deals that focus mainly on the existence of a minimum level that represents 2% of the voting rights or a value of LE 2 million of the transaction, whichever is less. This mechanism helps to activate and facilitate trading, specially for enterprises and to achieve higher probabilities of executing the entire quantity required. Also it contributes to increase the execution speed, reduces trading cost and to increase trading volumes which is positively reflected on increasing the market efficiency.

The total amount of trades in currency section of BBVB in last month has made 42,752 million AZN, and in a dollar equivalent of 54,409 million. It is necessary to note, that average USD/AZN rate has made in April 0.7862 AZN for 1 USD..

2. * "Other" instruments refer to currency and futures market (only turnover), and OTC market registration totals (purchase and sale of bonds and stocks of open JSC) in a dollar equivalent ** Number of companies includes number of Issuers of both stocks and bonds.

3. As from March 01, 2012, BSE-Sofia has introduced new market segmentation and has started to operate two markets – Main BSE Market and Alternative BaSE Market. In this reference, from now on, we shall present as "listed" the companies, whose shares are traded on the BSE market, while as "registered" we shall present the companies, whose shares are traded on the BaSE market.

4. Turnover is without block transactions and public auctions

5. Since the Central Bank of Armenia does not disclose information on the "buy" exchange rate of AMD to the USD, official exchange rates were used in calculations. Value traded for Bonds and Stocks include values of the trades concluded through manual trades mechanism. "Bonds" includes trading statistics of Corporate and Government Bonds markets. "Other" includes trading statistics of FX market, Credit Resources market and Repo agreements statistics. Starting from 2011 Market capitalization calculation includes only stocks traded through continuous two-way auction.

6. The Sarajevo SE is now publishing the data of its SASX (primary) index rather than the BIFX index (secondary).

7. % change calculations on indices do not take into account currency fluctuations on this table. See Charts - Adjusted Return on Index.

8. Currency depreciation against the dollar is represented as a positive number, appreciation as negative.

9. Companies are those available for trading via both listed and unlisted or registered markets.

1. "Other" instruments refer to the OTC market registration totals (purchase and sale of bonds and stocks of open JSC) in a dollar equivalent. Number of companies includes number of issuers of both stocks and bonds.

2. EGX other volume this month stands for OTC and funds.

3. MSM carries out OTC transactions for closely held companies, which primarily transfers ownership between family members.

4. Other instruments include FX and repo agreements with corporate bonds. Since the Central Bank of Armenia does not disclose information on "buy" exchange rate, official exchange rates were used in calculations.
