Futures trading is not suitable for all investors, and involves the risk of loss. Futures are a leveraged investment, and because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for a futures position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyle and only a portion of those funds should be devoted to any one trade as traders cannot expect to profit on every trade. All references to options refer to options on futures. All references to specifications herein are made subject to and are superseded by official GreenX rules. Current rules should be consulted in all cases concerning contract specifications.
