INDIA, LATAM HEDGE FUNDS LEAD INDUSTRY GAINS AS FINANCIAL, GEOPOLITICAL RISKS SURGE

***HFRI EM Russia/Eastern Europe surges in recent months, paring YTD decline;
HFR Cryptocurrency Index up +17.9 percent YTD despite 3Q fall***

CHICAGO, (September 27, 2023) – Emerging Markets hedge funds extended gains through mid-2023 as managers navigated a complex and evolving paradigm of risks ranging widely and in a volatile manner between persistently high inflation and the potential impact of additional rate increases, to the possibility of a US recession and weakening consumer demand. Industry wide hedge fund performance was driven by EM and Cryptocurrency funds through mid-year as investors positioned for these risks, while Asian currency weakness accelerated with the Japanese Yen and Chinese Yuan falling to historic lows against the US Dollar. The HFRI EM: India Index surged +18.7 percent YTD through August, while the HFRI EM: Latin America Index jumped +14.5 percent YTD, as reported today with the releases of the HFR Asian Hedge Fund Industry Report and the HFR Emerging Markets Hedge Fund Industry Report from HFR®, the established global leader in the indexation, analysis and research of the global hedge fund industry.

Despite the military conflict following the Russian invasion of Ukraine continuing through its second year, hedge funds investing in Eastern Europe and Russia surged in recent months through unprecedented uncertainty and volatility, with the HFRI EM: Russia/Eastern Europe Index vaulting +20.6 percent from June through August. After declining -15.6 percent in the first five months of the year, the Index is now back into positive territory with a +1.9 percent YTD return through August; this following a steep performance decline of -40.3 percent in 2022.

The HFRI Emerging Markets (Total) Index, which covers all EM regions, advanced +5.2 percent YTD through August. The investable HFRI 500 Fund Weighted Composite Index, which consists of funds investing in both Emerging and Developed markets, gained +2.5 percent YTD through August, led by the HFRI 500 Equity Hedge Index, which jumped +4.2 percent YTD.

Total Emerging Markets and Asian hedge fund assets rose through mid-2023, with Emerging Markets increasing to estimated \$246.9 billion, while total capital invested in Asian hedge funds rose to \$127.2 billion to begin 3Q23.

In addition to India and Latin America, other Regional Emerging Markets indices also posted gains to begin 2023, with the HFRI EM: MENA Index gaining +3.9 percent YTD through August, while the volatile HFRI EM: China Index declined -1.4 percent YTD through August, this after falling -19.3 percent in 2022. The HFRI Japan Index posted a strong gain of +7.7 percent YTD through August as the Japanese Yen declined sharply against the US Dollar.

Hedge funds with high exposure to cryptocurrency across EM regions including Korea, Russia, China, the Middle East, as well as Japan have surged thus far in 2023, with the volatile HFR Cryptocurrency Index vaulting +17.9 percent YTD through August; this after plunging -54.0 percent in 2022.

“Surging financial and geopolitical risks continue to define EM hedge fund performance, with managers navigating fluid and volatile market cycles and rapidly shifting sentiment and volatility across equity, currency, commodity, and fixed income markets. Despite early summer declines from generational levels, US inflationary pressures continue to drive risks across EM markets, with prospects for additional rate increases simultaneous with a weakening economy presenting an unusually complex environment,” stated Kenneth J. Heinz, President of HFR. “Presenting additional EM risks, global fixed income and equities have seen correlations rise (similar to April 2022) accentuating the sensitivity of equity markets to increases in interest rates. Furthermore, while geopolitical risks remain elevated as a result of the Russian invasion of Ukraine, the potential for additional conflict in east Asian regions also represents risks of extreme dislocations and disruptions to industrial supply chains. Leading global institutions and investors seeking opportunistic access to these trends are likely to increase allocations to specialized EM and Cryptocurrency hedge funds through 2H23 which have demonstrated their strategy’s success and robustness through recent and ongoing volatility.

About HFR Database

The licensed/redistributed HFR Database, currently comprised of nearly 6,000 alternative investment products, is available to all accredited investors. Information on our hedge fund universe of established and emerging managers is collected directly from the fund managers and/or their respective offshore administrators, while other pertinent information is culled from offering memoranda, onsite visits, and due diligence interviews.

HFR Database is utilized globally by thousands of accredited investors at leading banks, brokerage firms, investment advisors, wealth managers, funds of hedge funds, hedge funds, academic institutions, foundations, endowments, family offices and sovereign wealth funds. All client relationships are confidential in nature.

HFR believes that accurate information on fund managers is critical to any alternative investment enterprise. To that end, our analysts have monitored and tracked performance and administrative data internally on approximately 26,000 historically, covering both domestic and international funds, offering comprehensive information not available from other commercial data providers. HFR's dedicated Research Staff searches for new funds to add to the Database on a daily basis.

► **HFR provides subscribers with an unparalleled breadth of fresh information with daily updates**

- HFRDatabase.com is updated daily with fresh data & information, recently submitted by a broad spectrum of funds. New fund data is added by HFR staff or by the fund managers themselves. We do not work with third party data providers

► **HFR works directly with FUND MANAGERS to gain the most up-to-date and accurate fund info possible**

- HFR requests that our client fund managers report performance by the 15th of each month. We also directly integrate the fund manager with HFR Database by providing them with their own website for updating their fund profile. In this manner HFR ensures current and accurate fund data that flows seamlessly from fund managers to subscribers.

► **Database includes Administrative, ROR, AUM, Instruments and Region fund data**
